Coltrain unless otherwise specified. Quark is brought to you by *OrionWorks* with occasional help from **Grasshopper Press** when I feel an inspirational mood overtake me. Final layout is assembled in InDesign CS5. Some might be asking how do you pronounce "Sonova Quark"? There isn't one. Due to the small size of this edition, it has been brought to you in color!

This edition was created for **Turbo Charged Party Animal**, #354.  
Completed (*somewhere around*) on December 28, 2015

## What will 2016 Bring us?

**Probably lots of political drama and little substance.** While my heart is with Bernie I'm afraid my pragmatic mind urges me to stick with Hillary to help ensure that our country doesn't completely backslide a century's worth of hard fought social progress.

### Other Stuff:

This is a shortened edition due to the distractions of the holidays. I would have thought that now that I'm retired I ought to have oodles of extra time on my hands to do all sorts of stuff... stuff I never had time to do in the past. Apparently that's not the way it works. The good news is that I'm pretty much doing what I want to do, and I certainly ain't complaining about that. I continue to make decent progress in my multi-year Kepler research project. More on that in future installments. The bad news is, well... numerous *honey-do*\* projects I had every intention to tackle (and possibly even complete in my first year of retirement) are still on the drawing board bogged down by the vagrancies of psychological bureaucracy. I did manage to install some really nice look'in wood shelving in our basement. They will help relieve the lack of adequate cupboard space in our micro-kitchen.

My therapy poster for December  
(I'll probably post this out on FB soon)
